- Turkish (Native)
- English (Work-Proficiency)
- German (Beginner)

EXPERIENCE

Unity Developer   2021 – 2022
Winter Sky Studio
Made without using outsource assets.

- Participated in Magara Jam #4 alongside two esteemed colleagues whom we met during our university years. We collaborated to create a game titled "What's in My Bag."
- Successfully presented our game to publishers and passed the initial elimination phase.
- Our linear 2D game project was initiated with the goal of providing a lengthy and immersive gameplay experience. Unfortunately, the project remained unfinished.

Unity Developer   2022
DigiAge (Bilişim Vadisi / Corridor Team)
Made without using outsource assets.

- Embarked on a 10-day adventure creating a game named "Corridor" in Bilişim Vadisi.
- The experience brought immense joy from:
  - The process of game development.
  - Our eventual success.
  - Friendships forged during the event.
- Received training, developed games, and exchanged ideas.
- The concept presented during the game's presentation phase received a positive reaction.

ABOUT ME

As a recent graduate of Akdeniz University's Management Information Systems department, I bring four years of experience in both game programming and web development. In my approach to projects, I place teamwork at the heart of success. Collaborating with diverse individuals allows us to harness collective intelligence, pool our strengths, and achieve remarkable outcomes.

CERTIFICATES AND PROJECTS

I showcase all my projects, certifications, and developer accounts on my personal website. Including this website link on my CV offers convenient access to a detailed portfolio of my work:
